

MAKING COMPUTERS THINK FOR 25+ YEARS

PRECISION. INNOVATION. PUBLIC SERVICE.

At E-Ring, Inc., we believe that modern governance requires more than just digital record-keeping; it demands intelligent, high-performance software that transforms complex data into actionable insights. As an established leader in the government technology sector, we specialize in developing sophisticated software solutions engineered specifically for the unique demands of local jurisdictions.

BRIDGING TECH & PUBLIC ADMINISTRATION

We have built our reputation on a foundation of technical excellence and a deep understanding of the public sector. Our mission is to empower local governments with high-tech tools that streamline operations, enhance transparency, and ensure fiscal accuracy. By replacing fragmented legacy systems with our cohesive, innovation-driven Capture platform, we enable departments to work with unprecedented speed and precision.

WHY E-RING?

Engineered for Excellence: Our software architecture is built by experts who prioritize scalability, security, and high-speed processing.

Government-First Focus: We don't provide "one-size-fits-all" enterprise software. Every line of code is written to solve the specific regulatory and administrative challenges faced by local officials.

Proven Reliability: With years of successful implementations, we are a trusted partner to jurisdictions looking to modernize their infrastructure without compromising on stability.

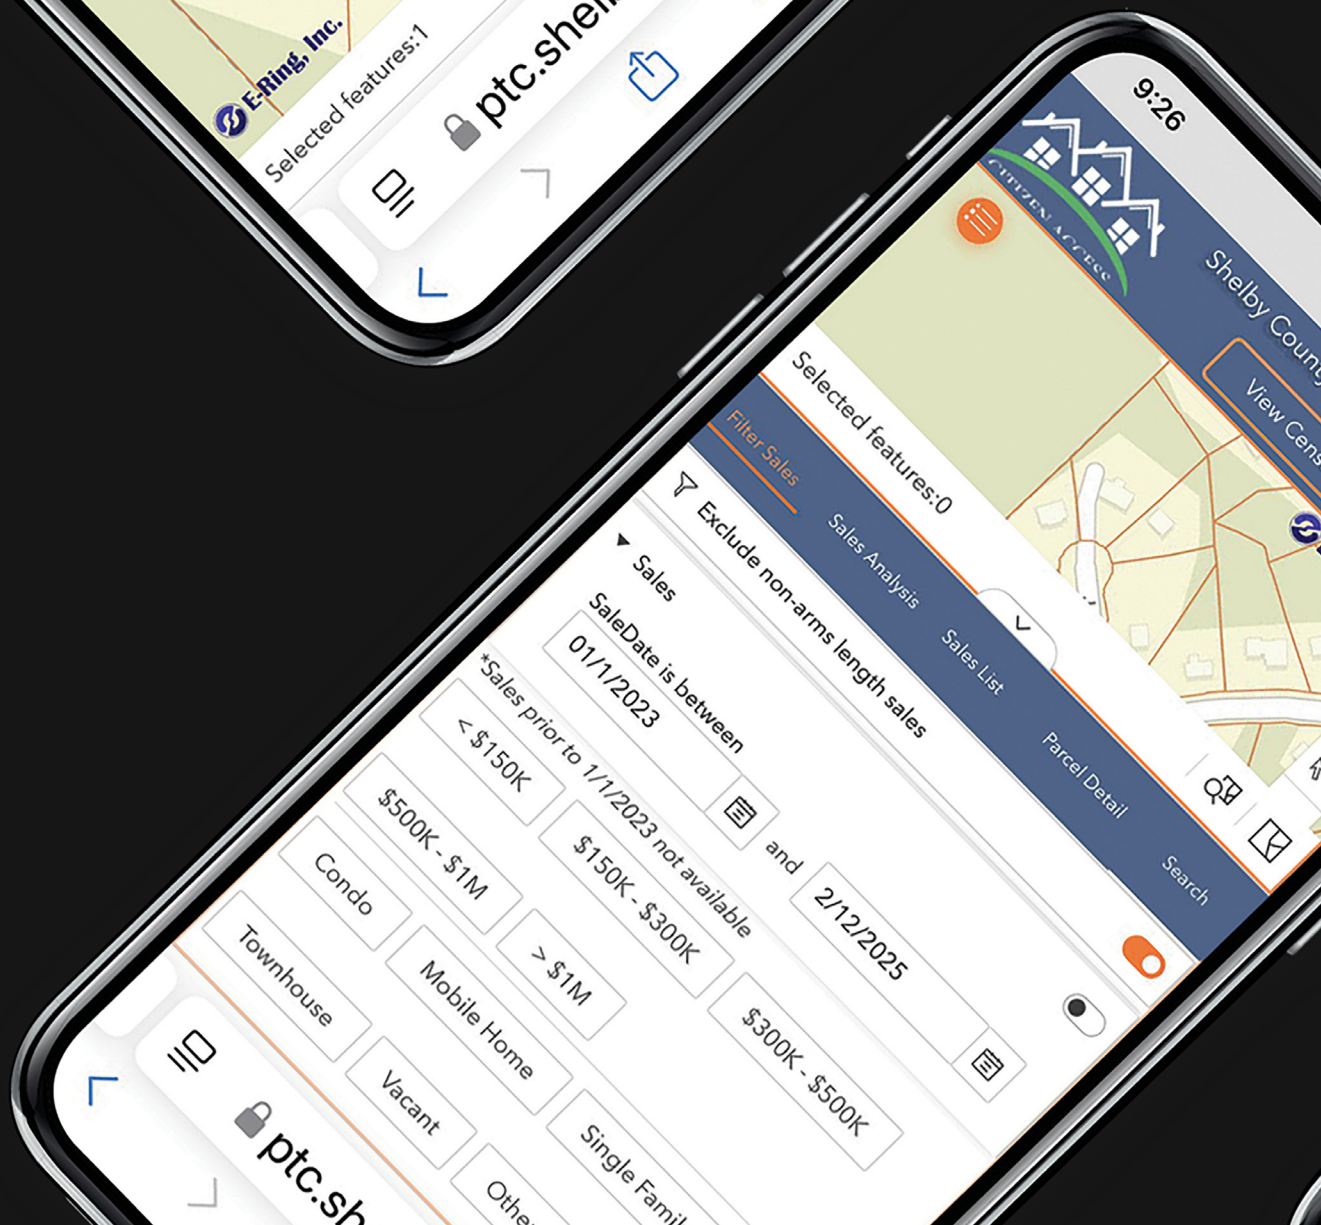

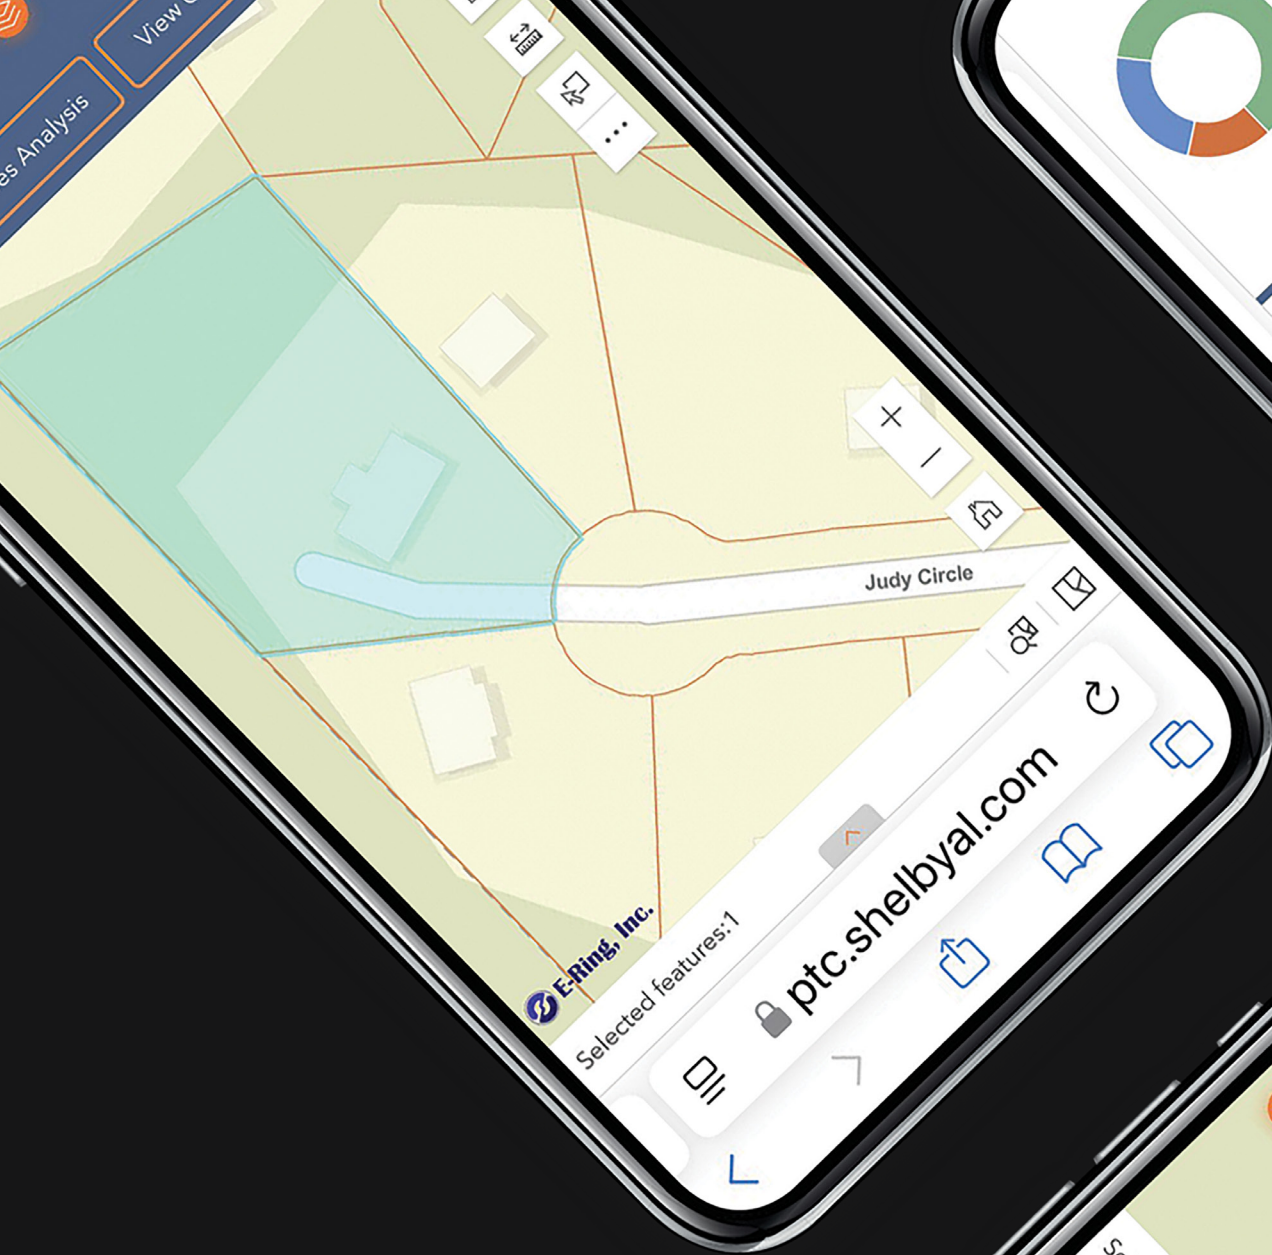

PROPERTY LOOKUP

CONNECT PROVIDES USER FRIENDLY
SEARCH TOOLS FOR EVERY SCREEN
KEEP THE COMMUNITY CONNECTED WITH THE LATEST DATA.

The Property Lookup engine serves as the foundational database interface for the public. The Property Lookup engine is a user-friendly database interface designed for public access across various devices. It allows users to search for real and business personal property information using criteria like parcel numbers or owner names.

The platform provides detailed property profiles, including square footage and tax histories, and offers an easy option to download or print summaries and courtesy notices in PDF format. Additionally, it features specialized portals for high-volume professional users, such as CPAs and real estate investors.

GIS INTEGRATION

EMBED YOUR COUNTY MAP INTO
THE PROPERTY SEARCH EXPERIENCE
COMMUNITY INTERACTION WITH PARCEL BOUNDARIES & MORE.

The GIS integration enhances user experience by transforming alphanumeric text data into an interactive visual geospatial format with integrated county maps. It enables property lookup tied to regional maps, allowing users to easily identify spatial boundaries and geographical constraints. The system also provides market

analysis by visualizing comparable sales on the county map, helping homeowners, appraisers, and buyers assess recent neighborhood sales. Additionally, it includes demographic overlays with socio-economic indicators and neighborhood demographics displayed through visually appealing charts alongside the maps.

APPLICATION FILING

A DIGITAL GATEWAY TO CONVENIENT
ONLINE APPLICATION SUBMISSIONS

A SELF-SERVICE PORTAL FOR THE COMMUNITY.

A digital application and management system that enhances efficiency in public service processes. It offers online submission for various applications, allowing residents to file for tax exemptions like Homestead and "Over 65" from home, eliminating the need for in-person visits. Citizens can also protest valuations online

by submitting customized forms and supporting documents. Connect streamlines administrative management by facilitating secure information exchanges and allows users to submit address changes and other updates. Additionally, it reduces processing time by ensuring completed submissions reach your office clerks.

PAYMENT PROCESSING

CONNECT PROVIDES AN ONLINE
PAYMENT PROCESSING PLATFORM
CONNECT IS MORE THAN JUST A PUBLIC WEBSITE.

The Payment Processing system transforms the public-facing portal into an e-commerce hub, simplifying tax compliance by eliminating typical municipal bill-paying obstacles. It features a virtual shopping cart that allows users to search for properties, view itemized tax liabilities, and combine multiple bills. Secure payment options include major

credit cards, debit cards and e-checks; e-checks transactions are zero cost. All of this is designed with mobile-first responsiveness for convenience. Additionally, Connect supports complex workflows for local government transactions, like digital Tax Lien Certificate delivery and tracking.

E-Ring is more than a software provider; we are architects of digital transformation. We continue to push the boundaries of what is possible in gov-tech, ensuring that our clients are always equipped with the most advanced tools to serve their communities effectively.
